Fictional outpatient consultation

Dr. Farhana Sultana (Demo)

Demonstration prescriber

MedDesk Demonstration Clinic

Not registered - demonstration only

Dhaka, Bangladesh

Name: Ayesha Rahman

Age: 32 years Sex: Female

Patient ID: DEMO-BD-001 Date: 2026-09-12

Address: Dhanmondi, Dhaka, Bangladesh

C/C

Sneezing, watery nasal discharge and itchy eyes for 3 days.

Intermittent mild headache for 1 day.

History

Symptoms followed exposure to household dust. No fever or breathing difficulty reported. No known kidney or liver disease; no regular medicines. All history is fictional.

Allergies

No known drug allergy in this fictional scenario.

O/E

Alert and comfortable. Clear nasal discharge. Chest clear on auscultation. All findings are simulated.

Observations (simulated)

BP: 112/72 mmHg

Pulse: 76/min

Temperature: 36.7 C

Weight: 58 kg

SpO2: 99%

Assessment / Dx

Allergic rhinitis - illustrative working diagnosis.

Investigations

No investigations requested in this demonstration.

Rx

1. Cetirizine 10 mg

Tablet | Generic: Cetirizine hydrochloride

Dose: 1 tablet (10 mg)

Route: Oral

Frequency: Once daily, in the evening

Duration: 5 days | Quantity: 5 tablets

May cause drowsiness. Avoid driving if drowsy.

2. Paracetamol 500 mg

Tablet | Generic: Paracetamol

Dose: 1 tablet (500 mg)

Route: Oral

Frequency: Every 6 hours only if needed for headache

Duration: Up to 2 days | Quantity: 8 tablets

Maximum 4 tablets in 24 hours in this example. Do not combine with other paracetamol-containing products.

Advice

Avoid dust and smoke. Use a mask when cleaning.

Seek prompt assessment if breathing difficulty, facial swelling or worsening symptoms occur.

Diet

Maintain usual meals and adequate oral fluids.

Follow-up

Review after 5 days if symptoms persist; earlier if worsening.
